

Schedule of presentations

25.3.26

- 12:15-12:25: Randomized incremental construction of the convex hull - [Yana Movsesyan](#)
- 12:25-12:35: Simplex algorithm with random pivots - [Istref Uka](#)
- 12:35-12:45: Randomized Newton Method – [Jan Walliser](#)
- 12:45-12:55: Randomized marking algorithm - [Krishna Sri Chaitanya Kesani](#)
- 12:55-13:05: Approximation algorithm for Max-3SAT - [Bala Venkata Kishore Chowdary Pinnaka](#)
- 13:05-13:15: QuickSelect - [André Vieira Ribeiro](#)
- 13:15-13:25: HyperLogLog - [Mark Starzynski](#)
- 13:25-13:35: Stochastic gradient descent - [Sravan Kumar Nakerakanti](#)
- 13:35-13:45: Randomized rumor spreading - [Petr Sabovčik](#)
- 13:45-13:55: Random spanning trees - [Rithik Koti Pasumarthi](#)
- 13:55-14:05: Randomized graph sparsification - [Rakesh Varma Kumbha](#)

26.3.26

- 16:15-16:25: Skip lists – [Dominik Malina](#)
- 16:25-16:35: Evolutionary algorithms - [Kevin Lautenschlager](#)
- 16:35-16:45: Cuckoo hashing - [Norman Azar](#)
- 16:45-16:55: Smallest enclosing circle (Welzl's algorithm) – [Patrick Weber](#)
- 16:55-17:05: Miller–Rabin primality test - [Jevin Thaiparampil](#)
- 17:05-17:15: Randomized load balancing (“power of two choices”) - [Doudou Wu](#)
- 17:15-17:25: Locality-sensitive hashing (LSH) for nearest neighbor search – [Luqman Muhammad](#)
- 17:25-17:35: Random walks for graph algorithms - [Hareeswara Nune](#)
- 17:35-17:45: Randomized leader election in distributed systems - [Pavel Valiuzhenich](#)
- 17:45-17:55: Pollard's Rho algorithm for integer factorization - [Diyor Musakhanov](#)
- 17:55-18:05: Bloom Filters – [Erion Krasniqi](#)
